

## MANAGEMENT

It is very easy to use, just enter the access key card and apply a personal code (chosen by the guest) in the keyboard.

C+P safe uses the same management system which is also used for the other access control devices (locks, readers, energy saving devices, etc...), making it easy for the hotelier and giving a whole access control solution for the room and safe management.

## TECHNICAL FEATURES:

### C+P MODULE: MAGNETIC STRIPE READER + KEYBOARD

- ISO/ABA with three track.
- Reading the third track, leaving free first and second tracks for other applications.
